

EM-Assist Announces Colorado Office Opening

DENVER, CO – November 16, 2007 – EM-Assist, Inc., a leading provider of environmental services and training solutions to government clients, announced today that it has opened a new office in Denver to expand its long-term commitment to Colorado-based Department of Defense installations. The new office is located in a major hub for defense contractors, and is near numerous military installations, including Buckley Air Force Base, Cheyenne Mountain Air Force Station, Peterson Air Force Base, and Fort Carson.

EM-Assist President Lynn Meland said, “EM-Assist is committed to growth that enables us to better serve our clients. Our Colorado team is helping Federal Government clients in many interesting ways, including implementing EM-Assist’s Web-based Environmental Management Information System (WebEMIS™) which provides centralized visibility into data collected from multiple sites. This allows for system-wide program monitoring and reporting while also reducing our clients’ environmental compliance costs.”

Client Services Manager Brian Perry, a lead technology-based project manager who helped open the Denver office, said, “I joined EM-Assist because everyone at the company is incredibly focused on ensuring high levels of client satisfaction. We do this by being responsive to client needs and implementing innovative solutions to overcome client challenges. Opening our Denver office is just one example of how we do this. The new office allows us to be even more responsive to local clients, and to continue to innovate by broadening our suite of technical services through tapping into the skilled Denver labor market. We have four full-time employees in our Denver office now, and are planning to add to that number in the coming months.”

ABOUT EM-ASSIST

EM-Assist, Inc. is government’s trusted partner for environmental program management, technical support, and training solutions. The company helps clients cost-effectively address their most challenging environmental compliance, information management, conservation and planning, and restoration needs. EM-Assist also helps clients deliver the right training to the right people at the right time by blending custom eLearning courseware with instructor-led training, and by providing efficient training program administration through powerful, easy-to-use learning management systems. EM-Assist, founded in 1996, is headquartered in Folsom, CA and has 120 professionals in multiple offices throughout California, Utah, and Colorado. Additional information can be found on the company’s Website located at www.EM-Assist.com.
