

EM-Assist Recognized by the EPA as a Green Power Partner

FOLSOM, CA – October 10, 2008 – EM-Assist, Inc., a leading provider of environmental services and training solutions to government clients, was recently recognized by the U.S. Environmental Protection Agency (EPA) as a Green Power Partner. The EPA's Green Power Partnership is a voluntary program that supports organizations' procurement of green power by offering expert advice, technical support, tools, and resources. As a Green Power Partner, EM-Assist is able to reduce its carbon footprint by purchasing green power from a local utility that generates renewable energy from newly developed wind power.

In addition to an internal company-wide commitment to green power, EM-Assist is actively engaged in supporting its clients' green power goals and initiatives. For example, EM-Assist contributed directly to a landfill methane gas capture project that generates two megawatts of electricity for Hill Air Force Base (AFB), and the company is currently researching greenhouse gas reduction initiatives for Hill AFB including use of alternative fuels for transportation. EM-Assist is also developing an education program for its own employees to introduce green power alternatives to individuals and their households.

"Formalizing our commitment to green power is a specific, actionable step we took to do our part in reducing global climate degradation and our dependence on fossil fuels," said EM-Assist Chief Executive Officer Jeremy Burr. "The EPA's Green Power Partnership affirms our belief that green power alternatives have the potential to make a meaningful positive impact on the environment as businesses, governments, and individuals collectively switch to green energy alternatives. No step is too small, and we are happy to be a part of the solution."

EM-Assist's commitment to green power is consistent with the company's mission and values. A major aspect of EM-Assist's mission is to deliver results that improve the environment, and one of the company's core values is making resource conservation a priority in its business practices. EM-Assist's commitment to green power is both a commitment to lead by example and a commitment to assist clients and employees in the realization of their own green power objectives.

ABOUT EM-ASSIST

EM-Assist, Inc. is government's trusted partner for environmental program management, technical support, and training solutions. The company helps clients cost-effectively address their most challenging environmental compliance, information management, conservation and planning, and restoration needs. EM-Assist also helps clients deliver the right training to the right people at the right time by blending custom eLearning courseware with instructor-led training, and by providing efficient training program administration through powerful, easy-to-use learning management systems. EM-Assist, founded in 1996, is headquartered in Folsom, CA and has 120 professionals in multiple offices throughout California, Utah, and Colorado. Additional information can be found on the company's Website located at www.EM-Assist.com.
